

# LIBERTY UNIVERSTIY STUDENT CENTER LYNCHBURG, VA

ARCHITECT: VMDO Architects  
GENERAL CONTRACTOR: Construction Management Associates, Inc.  
PRODUCT INSTALLED: Curtainwalls, Storefront, Doors, ACM Panels, Louvers, Glass Handrails, Smoke Baffles  
SUPPLIERS: EFCO, Alucobond, Construction Specialties, Trulite Glass, C. R. Laurence

- Over 30,000 sq. ft. of curtainwall and storefront
- 10,000 sq. ft. of ACM Panels
- 3,000 sq. ft. of Glass Handrail System

This building is actually a large 150,000 sq.ft. rear addition to an even larger existing building. This addition made the back of the existing building the new front facing Liberty University's new, re-designed Main Quad Area.

**KEY ELEMENTS OF PROJECT**  
This project required very detailed ACM Panels along the perimeter of the roof line of the building. Each panel was 6 inches in height and 10 feet in length. This created a unique architectural shadow effect.

**SPECIAL NOTES:**  
The large curtainwall system on this project required extensive engineering and coordination between the architect, general contractor and ADG, as many of the elevations had to be loaded with steel reinforcement in order to meet wind loads.
