

POFF FEDERAL BUILDING ROANOKE, VA

ARCHITECT: Transystems Corporation
GENERAL CONTRACTOR: Balfour Beatty Construction, LLC
PRODUCT INSTALLED: Unitized Curtainwalls, Aluminum Plate Panels,
Louvers, Bullet Resistant Windows, Revolving Doors, Aluminum Storefront
and Doors
SUPPLIERS: Permasteelisa Group, Armetco Panels, U. S. Bullet Proofing,
Dorma USA, Kawneer

Not only was the original curtainwall system replaced on this building, but ADG's scope of work included installation of a structural steel system that supported the new unitized curtainwall system.

KEY ELEMENTS OF PROJECT

The project was extra challenging because it remained a functioning federal courthouse throughout the demolition and re-construction of the exterior envelope. ADG was expected to keep noise and vibrations to a minimum, with the possibility of being held in contempt of court for any workers that disturbed the proceedings while court was in progress.

SPECIAL NOTES:

This renovation was primarily a re-skinning of the existing facility. The existing 50,000 square feet of single pane glass was removed and replaced with a triple-glazed high performance insulated unitized glass curtain wall system.
